

Thank you for buying **Animated Loading Icons!**

How to use

1. First you need to have a UI Canvas setup with the camera in your scene.
Like this:

2. Then simply drag and drop the prefab onto the **Canvas**. For example if we use the "Bars 1" prefab it would look like this:

3. That's it, by default the icon will be located in the center of the screen, and the animations will play automatically when in play mode.
